Group3Fit50 Map page documentation

What is the Map Page:

The Map page is an easy to use page that allows you to find gyms and parks near you.

What is the Map Page made up of:

- WP Store Locator Plugin https://wordpress.org/plugins/wp-store-locator/
- Google Maps API

How the Map is managed:

WP Store Locator Plugin Documentation: https://wpstorelocator.co/documentation/

Google Maps API Documentation: https://developers.google.com/maps/documentation

1. Adding New Locations
   a. Navigate to the wp-admin page and login with the provided admin account
   b. Click the **Store Locator** plugin on the left panel
   c. Click the **New Store** button
   d. Fill in the store title and location, check either Gym or Park in the Store Categories section on the right hand panel. Publish when done
   e. The location will now show up on the map
2. Change the Maps API Key
   a. Navigate to the wp-admin page and login with the provided admin account
   b. Click the **Store Locator** plugin on the left panel
   c. Click settings
   d. Under **API Key** enter the new one
   e. Save changes

API Key billing

With the Google Cloud Project account we have setup for you, we generated the API Keys that are used in this website billing is handled as follows:

- You have a $100 of credit and are charged $5 per 1000 requests
- This means you have 20,000 free hits to your Map page a month
