    - How we achieved all functionality
    - What features need work

- Site Demo

- Deployment Plan

Review of Site

Overview/Goal

- Provide active teens with nutritional resources and advice

- Educate through quiz and activity modules curated to specific themes

- Help find nearby fitness resources

- Implement social media capabilities into the site, allow students to share their progress

Progress Report Follow-Up

Following our last report, we have completed these 'Next Steps':

- **User/Registration** - All membership levels are available with their proper permissions

- **Game Development** - Lesson structure created and a few example lessons implemented

- **Blog Development** - Blog page active with posts, comments and groups

- **Map** - Google Maps API integrated

Requirements

Requirements - Utilize Social Media

- A Share button on the Game page will allow Students to post about records or achievements onto their connected social media.

- Social Snap Lite Plugin

Share your progress!

Click to Tweet 🐦
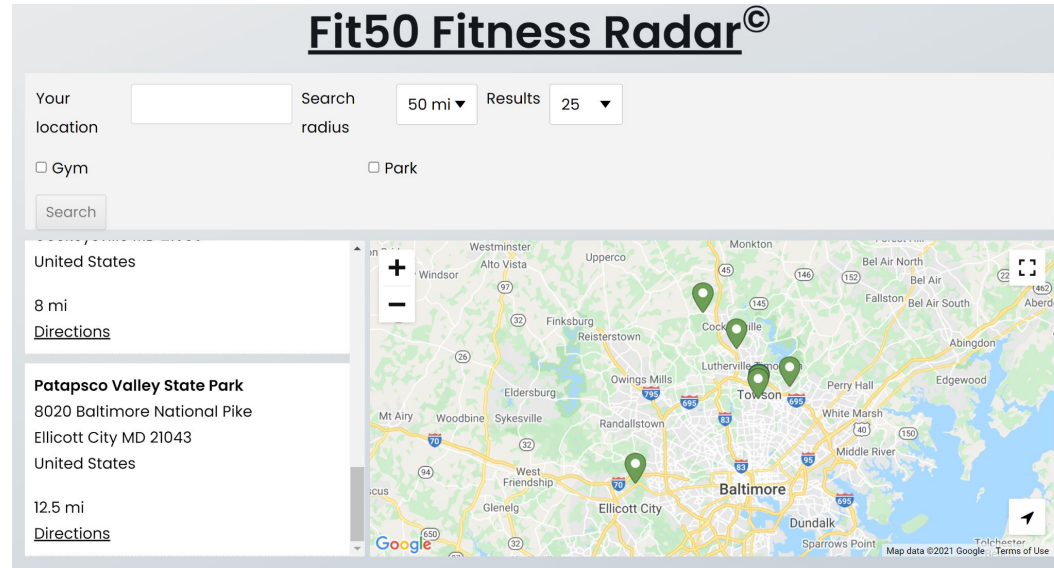

Twitter   Facebook   More

Requirements - Provide All Functionality on Domain

- Game runs onsite
  - Iframe is used to display on Game page

- Professional's blogs and information hosted on site in the Blog page

- External utilities implemented into the site
  - Google Maps API on the Map page

Requirements - Fitness Search

- Our Fitness Radar lists local gyms and other facilities

- Users can input their location to search around them

- Businesses can get their location highlighted on the map

- Utilizes Google Maps API

Requirements - Expert Services

- Expert accounts allow the posting of informative blog posts and Q&As for students on the blog page.

- Experts can moderate their groups aesthetics and content, restrict viewership, and invite members.

- Utilizes BuddyPress

Incomplete Features

- Map does not automatically identify fitness locations, instead every location needs to be input manually

- Membership prices are currently all $5 which is inaccurate

- Social Media plugin creates a popup of the related site, going off domain slightly

- Parent to Student account linking currently not set up sufficiently.

- Add more levels to our game

Deployment Plan

Namecheap Hosting Transfer

- Namecheap allows us to transfer our website to another namecheap account

- Using this we will transfer to our clients host account

- We will also link to our github repo which has a folder with documentation for our additions

Training

- Show how to employ backups via C-Panel

- Using the documentation that we provided in github walk them through each site

- Our documentation also has all of the necessary plugins for the page, linking to the necessary documentation for the plugin

Dependencies

Website is dependent on …

- a host, let it be namecheap or another host

- The Social Media and Google Maps API's

- The plugins provided on Wordpress
